Vermont Municipal Bond Bank

Update to credit analysis

Summary

The Vermont Municipal Bond Bank's (Aa2 stable) d/b/a Vermont Bond Bank, "the bank", credit quality reflects the weighted average credit quality of the participating borrowers that is further enhanced by the Vermont State Aid Intercept Program (Aa2 stable) and the debt service reserve fund that is secured by a moral obligation of the state of Vermont (Aa1 stable). The rating also incorporates the large and diverse pool of program participants, the bank's strong legal covenants and debt structure, as well as an experienced management team.

Credit strengths

- » Highly rated state and strong legal provisions
- » Sizeable and diverse pool of participants
- » Experienced management team
- » Adequate debt service reserve and operating reserve funds

Credit challenges

- » Very small excess cash flows due to program design
- » Decline in state aid
- » Pool credit quality is dependent on state intercept rating

Rating outlook

The stable outlook reflects the sound credit quality of the very large pool of program participants that is unlikely to materially change over the outlook period. In addition, the bonds benefit from adequate payment timing mechanics to the trustee from the participants or the state, if the intercept is triggered. Further credit strength is provided through managements policies and procedures which have led to essentially all participants being reviewed annually.

Factors that could lead to an upgrade

- » Upgrade to the state of Vermont's general obligation rating
- » Improved credit quality of pool participants
- » Substantially higher unrestricted reserve levels

- » Significantly strong coverage of debt service from cash flows

Factors that could lead to a downgrade

- » Downgrade to the state of Vermont's general obligation rating
- » Deterioration of credit quality of pool participants
- » Change in pool composition
- » Material reduction in reserve levels

Key indicators

Exhibit 1

Pool Characteristics

Size and Diversity	
Size of Portfolio	199
% of Borrowers with less than 1% of the pool	40.10%
% of loans to the top 5 borrowers	22.08%
Total loans outstanding (\$ millions)	\$599,275
List of significant participants	
Champlain Valley School District	5.80%
St. Albans (City of)	5.00%
South Burlington (City of)	4.80%
Middlebury (Town of)	3.50%
Burlington (City of)	3.00%
Brattleboro (Town of)	2.90%

Profile

The Vermont Municipal Bond Bank was created in 1969 and is authorized to issue bonds in order to provide loans to local governments. Following the July 2021 issuance the bank will have \$599 million in outstanding loans and since its inception has provided over \$2.5 billion in loans for local infrastructure throughout Vermont. Approximately 98% of the loans are secured by a general obligation of the municipality, school district, or special district.

Detailed credit considerations

Credit strength and default tolerance: Adequate pool credit quality and low default tolerance

The pools credit quality is adequate, but the default tolerance is low. Pool credit quality (A-range) reflects the general obligation rating of the local government equal to 63% of pool participants, the State intercept programmatic rating (Aa2) is applied to 34% of participants, the remaining participants are special districts and are revenue bonds with a 1.25x revenue pledge. A unique attribute of the bank is the strong state law protections requiring all participants securing their loan with a general obligation pledge, which is essentially all participants, are required to assess and collect funds owed to the Bank.

The low default tolerance (10.9%) reflects the bond bank borrower program designed for achieving 1x coverage for tax backed participant loans. As a result the banks debt service coverage is generally sufficient and generates minimal excess cash flows. While debt service reserves are fully funded and the banks operating reserve is adequate, the additional reserves provide only modest improvement of the default tolerance.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

Diversity of portfolio: Highly diverse pool of participants

The pool is very diverse with 199 participants with a broad geographic draw across the state of Vermont. The top five participants, by outstanding debt, account for a modest 22% of the pool debt, however the participant with the most debt in the pool, which accounts for 5.6% of the debt, Champlain Valley School District, is a regional school district with six members, providing further diversification. Added diversification is demonstrated with 39% of the participants each have outstanding debt accounting for 1% or less of the pool total debt.

As of July 2021 the bank estimates that 63% or \$377 million of debt is local governments, 34% or \$203 million is school districts, and the remaining 3% or \$19.6 million special districts.

Participants are geographically diverse with the debt allocated to participants in all 14 counties. Participants located in Chittenden county have issued the most debt with 24% of the pools outstanding debt.

Debt structure and cash flow: Strong debt structure and cash flow bolstered by general obligation nature of pledge

The debt structure is strong. It is secured by a general obligation pledge of the Bank, including its general operating reserve fund and available cash; general obligation unlimited tax pledge of the pool participants; a state intercept; and a three prong debt service reserve fund backed by a moral obligation pledge of the state.

The debt of the Bank consists entirely of fixed rate obligations. Debt policy limits amortization of debt to the useful life of assets, mandates a flat or front loaded debt service schedule, and does not provide for use of interest rate swaps or other derivative products. Borrowers loan payments are due on November 1 and May 1, which is 30 days prior to debt service payment dates on the bank's bonds.

The borrowers with a general obligation pledge qualify for an enhanced rating based on the state intercept. Some borrowers do not receive state aid so the intercept is not applicable to them and for pool purposes they receive an internal rating or credit estimate.

Debt service coverage is typically at 1x coverage each year over the entirety of the amortization. The low 1x coverage for the pool is mitigated by the cash flows based on debt service reserve fund balances and operating reserves of \$85 million. This allows for 10% default rate in the pool without further cash inflows from the state or participants. Additional mitigation is provided by the debt structure with 98% of the pool supported by a unconditional general obligation unlimited tax pledge of the participant, which is required to be funded by each participant pursuant to state statute.

Legal security

The bonds are a general obligation of the Vermont Municipal Bond Bank, and the full faith and credit pledge of the bank is pledged for the payment of debt service on their municipal bonds. Additionally, the State provides a moral obligation to replenish the reserve fund if there is a draw on the reserve that reduces the amount below the required debt service reserve.

Debt-related derivatives

The bond bank is not party to any interest rate swaps or other derivative agreements.

ESG considerations

Environmental

No material environmental consideration. As a US state with a wealthy and diverse economy, the flexibility to raise revenue, and support from the federal government, Vermont will continue to demonstrate high resilience to environmental risks. In general, US states face low credit risk stemming from environmental events, the most likely to occur being natural disasters. Even among US states, Vermont's environmental risks are low. With no coastal exposure, Vermont counties are primarily exposed to extreme rainfall risk, according to data from Moody's affiliate Four Twenty Seven. Increased rainfall could result in more frequent local or regional flooding. We expect the state and most of its local governments have the resources and capacity to address flood events. Heavy storms have caused extensive flooding throughout the state, but the state is able to apply its own resources as well as funding from the federal government to address damages. The state is working to build up the flood resiliency of its floodplains and river corridors

Social

No material social consideration. Vermont has one of the slowest growing populations in the US and the most rapid decline in prime working age population (residents aged 25-54). Since 2000, the state's prime working age population fell just over 16% and it has

fallen nearly 10% since 2010. These are the highest rates of decline over these two periods among the 50 states and the District of Columbia (Aaa stable). Since 2010, the prime working age population in the US grew nearly 5%. Support for health services by the federal government, mainly through Medicaid grants, represents a vulnerability for states and Vermont is no exception. Vermont is more vulnerable to a change in federal policy or funding than other states given that about 25% of its population is enrolled in Medicaid. This is far higher than the 17% of people enrolled across the US. Statewide, housing affordability has not fallen as much in Vermont as it has in many parts of the US. Though slow population growth could be a drag on future economic growth, it could keep housing affordable in most parts of the state

Governance

The Board of Directors of VMBB currently has five members including ex officio the state treasurer. Members of the board are appointed by the governor for two year staggered terms. Board members have a broad range of experience with a strong background in finance and not for profit management and governance.

The Bank has a small staff.. The Board under the direction of the executive director has led the Bank in an update of many of its policies. Substantive to the Bank's rating are updated loan policies and procedures requiring new loan participants to submit annual financial reports and annual monitoring of all pool participants. Currently, the bond bank achieves full annual monitoring of nearly 98% of outstanding debt.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
