Vermont Municipal Bond Bank

Update to credit analysis

Summary

The [Vermont Municipal Bond Bank](#) (Aa2 stable) demonstrates strong pool program characteristics including a stable and overall credit quality of pool participants, many of which are supported by the [Vermont State Aid Intercept Program](#) (Aa2 stable); large size and diversity of the pool; and the program's sound governance structure and legal provisions. The program also benefits from strong and proactive management and oversight. The bond bank's annual debt service is structured to yield just over 1 times coverage supported by a large debt service reserve fund that yields an adequate default tolerance provided by loan repayments and other available funds. Legal provisions include additional support by the [State of Vermont's](#) (Aa1 stable) moral obligation to restore the debt service reserve fund if it is drawn on, subject to appropriation.

Credit strengths

- » Large size and diversity of pool participants
- » Experienced management team
- » State aid intercept provision enhances credit quality on large portion of pool participants

Credit challenges

- » Limited excess annual cash flow due to program design resulting in low default tolerance
- » Maintenance of credit quality and diversity of pool given ability for new participants

Rating outlook

The stable outlook reflects strong structural elements of the pool program and the healthy credit quality of the loan pool which will be maintained given strong program management and oversight practices.

Factors that could lead to an upgrade

- » Improvement in the credit quality of pool participants
- » Improvement in annual debt service coverage and the pool's default tolerance
- » Upgrade to the state of Vermont's general obligation rating

Factors that could lead to a downgrade

- » Downgrade of the state of Vermont's general obligation rating

- » Deterioration in the credit quality of pool participants
- » Significant change in pool composition
- » Material decline in reserves

Profile

The Vermont Municipal Bond Bank was created in 1969 and is authorized to issue bonds in order to provide loans to local governments. Following the August 2022 issuance the bank will have \$515 million in outstanding loans and since its inception has provided over \$2.5 billion in loans for local infrastructure throughout Vermont. Approximately 98% of the loans are secured by a general obligation of the municipality, school district, or special district.

Detailed credit considerations

Recent developments: proposed modification to the general resolution

In the 2022 Series 2 and 3 bond resolutions, the bond bank has approved proposed modifications to the General Resolution that will not become enacted until reaching required bondholder consent levels. The modification includes the creation of a Senior and Subordinate debt structure. The senior lien bonds would be issued without a debt service reserve fund (no moral obligation backstop) but still benefitting from the state aid intercept program for pool participants. The Subordinate lien would include a debt service reserve fund benefiting from the state's moral obligation pledge as it stands today.

The modification also proposes changes to bond series resolutions that adds a debt service coverage ratio and additional bonds test requirement. Issuance of additional bonds under the bond series resolution is anticipated to require certification that revenues of the bond bank shall equal in each year that bonds are outstanding (1) at least 1.2 times debt service on the senior lien bonds and (2) at least 1.0 times debt service on all bonds. The General Resolution will maintain the 1.00 times covenant.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

The General Resolution requires consent of bondholders of not less than 66 2/3rd% in principal amount outstanding for the proposed modifications to take effect.

Loan portfolio: large pool size and diversity of participants

Following the issuance of 2022 Series 3 and 4 bonds, the program's pool will consist of 197 separate local governments borrowers with 212 loans outstanding. More than 85% of participants have less than 1% of the total loans outstanding. The loans outstanding of these participants represent 37.3% of the total pool amount. The five largest borrowers account for less than 25% of outstanding loans. The large size and diversity of the pool is a credit strength. Program cash flow is structured to provide a minimum 1.0 times debt service coverage on the bonds.

Credit quality and default tolerance: average credit quality of pool participants and low default tolerance

The pool's credit quality is adequate but the default tolerance is low. The pool credit quality is generally in the A-range and reflects the general obligation underlying credit quality of the participants and the application of the Aa2 enhanced rating that is assigned to any participant with sufficient state aid coverage over maximum annual debt service based on the state aid intercept program. Only 6% of loans outstanding carry a public rating including the City of [Burlington](#) (Aa3 stable) and Town of [Stowe](#) (Aa3). The pool is 98% secured by general obligation pledges of the participants with only 2% repaid by a revenue pledge of special districts that require 1.25 times revenue pledge. The largest participant is Champlain Valley School District which reflects 5.7% of loans outstanding and backed by a general obligation pledge. Participants are geographically diverse with loans allocated to participants in all 14 counties.

The pool has a low default tolerance of 10.9% that reflects the bond bank's program designed for achieving 1 times coverage for tax backed participant loans. As a result the bond bank's debt service coverage is generally sufficient and generates minimal excess cash flows. While debt service reserves funds and operating reserve provides only modest improvement of the default tolerance.

Liquidity

The bond bank has healthy liquidity with \$23.9 million held in the general operating fund reserve. The bond bank maintains a policy to keep at least 3% of total loans outstanding in the reserve fund which would equal around \$17.5 million. Almost all of the reserves including the debt service reserve funds are invested in State and Local Government Series securities or US Treasuries.

Legal framework, covenants and debt structure: sound legal provisions

The debt structure is strong. It is secured by a general obligation pledge of the bond bank, including its general operating reserve fund and available cash; general obligation unlimited tax pledge of the pool participants; a state intercept; and a three-prong debt service reserve fund backed by a moral obligation pledge of the state subject to appropriation.

The bonds are payable primarily from loan repayments from borrowers that provides for low 1x coverage and mitigated by additional revenue from debt service reserve fund balances and operating reserves if needed.

Legal security

The bonds are a general obligation of the Vermont Municipal Bond Bank, and the full faith and credit pledge of the bank is pledged for the payment of debt service on their municipal bonds. Additionally, the State provides a moral obligation to replenish the reserve fund, subject to appropriation, if there is a draw on the reserve that reduces the amount below the required debt service reserve.

Debt structure

The debt of the Bank consists entirely of fixed rate obligations. Debt policy limits amortization of debt to the useful life of assets and mandates a flat or front loaded debt service schedule. Borrowers loan payments are due on November 1 and May 1, which is 30 days prior to debt service payment dates on the bond bank's bonds.

Debt-related derivatives

The VMBB is not party to any interest rate swaps or other derivative agreements.

ESG considerations

Environmental

No material environmental consideration. As a US state with a wealthy and diverse economy, the flexibility to raise revenue, and support from the federal government, Vermont will continue to demonstrate high resilience to environmental risks. In general, US

states face low credit risk stemming from environmental events, the most likely to occur being natural disasters. Even among US states, Vermont's environmental risks are low. With no coastal exposure, Vermont counties are primarily exposed to extreme rainfall risk, according to data from Moody's ESG Solutions. Increased rainfall could result in more frequent local or regional flooding. We expect the state and most of its local governments have the resources and capacity to address flood events. Heavy storms have caused extensive flooding throughout the state, but the state is able to apply its own resources as well as funding from the federal government to address damages. The state is working to build up the flood resiliency of its floodplains and river corridors.

Social

No material social consideration. Vermont has one of the slowest growing populations in the US and the most rapid decline in prime working age population (residents aged 25-54). Since 2000, the state's prime working age population fell just over 16% and it has fallen nearly 10% since 2010. These are the highest rates of decline over these two periods among the 50 states. Since 2010, the prime working age population in the US grew nearly 5%. Support for health services by the federal government, mainly through Medicaid grants, represents a vulnerability for states and Vermont is no exception. Vermont is more vulnerable to a change in federal policy or funding than other states given that about 25% of its population is enrolled in Medicaid. This is far higher than the 17% of people enrolled across the US. Statewide, housing affordability has not fallen as much in Vermont as it has in many parts of the US. Though slow population growth could be a drag on future economic growth, it could keep housing affordable in most parts of the state.

Governance

The Board of Directors of VMBB currently has five members including ex officio the state treasurer. Members of the board are appointed by the governor for two year staggered terms. Board members have a broad range of experience with a strong background in finance and not for profit management and governance.

The Bank has a small staff. The Board under the direction of the executive director has led the Bank in an update of many of its policies. Substantive to the Bank's rating are updated loan policies and procedures requiring new loan participants to submit annual financial reports and annual monitoring of all pool participants.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
