ORGANIZATION OVERVIEW

The Vermont Municipal Bond Bank (the "Bond Bank") was created by the Vermont legislature in 1970 to assist eligible governmental units access public financing markets.

The Bond Bank provides municipal loans for local infrastructure projects through the pooled loan program. Loans are primarily financed through the Bond Bank's issuance of publicly offered tax-exempt bonds. On an on-going basis, the Bond Bank services its loans and provides outreach and planning assistance to potential borrowers.

Borrowers of the Bond Bank are exclusively governmental units of the state including cities, towns, villages, school districts, and other municipal entities throughout the state.

The Bond Bank also co-manages the State's Revolving Funds with the Department of Environmental Conservation. Loans are issued for the planning and construction of municipal drinking water and clean water projects.

More recently, the Bond Bank has identified additional sources of low cost lending dollars that will be developed into a Green Energy Finance program.

Please visit vtbondbank.org for more information.

DIRECTORS & OFFICERS

The Bond Bank is governed by a five-member Board of Directors with four appointed by the Governor and the State Treasurer as an ex-officio member.

Mission

To assist Vermont's municipalities and other qualified public bodies in gaining access to affordable, innovative and appropriate financing to meet their capital needs.

Vision

To support Vermont's municipalities and other qualified bodies in making informed and knowledgeable financing decisions for present and future generations.

HISTORY

The Bond Bank was created by the Vermont legislature in 1970 to assist governmental units access public financing markets. The Bond Bank has provided over \$2.3 billion in loans for local infrastructure projects across Vermont through its pooled loan program.

WHO WE SERVE

The Bond Bank pooled loan program makes loans to governmental units throughout the state. Borrowers can include any county, municipality, school district, or other public body. The distribution of borrowers among the several Vermont counties, and the number and amount of loans to different classes of borrower, are shown below.

The Bond Bank's pooled loan program makes loans to governmental units around the state, which include any county, municipality, school district, or other public body. All data below as of 12/31/2022.

Vermont Bond Bank

BACKGROUND / OBJECTIVES / SCOPE

Vermont Bond Bank is pleased to invite you to participate in our Request for Qualifications (RFQ) for the development of a Microsoft-based solution for loan portfolio management. We have reviewed your company's expertise in software development and believe that your organization possesses the necessary skills and experience to meet our requirements effectively.

The Bond Bank's currently utilizes multiple excel workbooks and HUB Spot ERM to manage its portfolio of loans. Borrowers have existing unique IDs that are available to cross walk borrowers among different programs. A view of existing loan database is available on our website at: https://www.vtbondbank.org/loan-search.

Current challenges to this approach involve multiple workbooks to update with the same data and in some cases, inconsistent data entry. Additionally, key pieces of borrower information are contained in many different workbooks at in our out of platform CRM (Hubspot).

The goal is to develop a solution to effectively monitor and manage our loan portfolio within the Microsoft environment. At a minimum, a version of the dashboard in Attachment B must be an outcome of the project. However, depending on budget and time, four related data flows roll up to the Comprehensive Dashboard, as shown below. If possible, full integration of these functions is desired of the final outcome in one or more dashboards.

Included in the dataflows is the desire for a dataportal for borrowers of the bond bank where historic loan documentation and other communication can be housed. Ideally, this would integrate with any submission portals for compliance items.

Comprehensive Borrower Dashboard (Attachment B)	CRM	Credit Profile Dashboard	Pipeline Tracking Across Programs	Borrower Document Portal
 Summaries of CRM, compliance, document summaries, existing loan status, loans in underwriting, and loan in progress 	 Integrated Microsoft CRM that allows updates and entries within environment of dashboards Allows quantitative and qualitative tags for updates related to pipeline, compliance, and other organization 	 borrower level credit information Data entry of financial statement information with formatting standardization Longitudinal view of 	 Entry and tracking of new loan prospects across programs Status updates (ex. underwriting, approval, closed) Assignment of closing and compliance checklists at closing Automated post issuance compliance reminders 	 Borrower portal to allow for access to historical files Borrower portal for submitting files

The solution should include, but not be limited to, the following key features:

- Dashboard views of borrower and portfolio level key data sets -see Attachment B
- Comprehensive loan tracking and monitoring capabilities
- Robust reporting and analytics functionalities
- Integration with existing systems, such as financial databases and CRM tools
- User-friendly interface for easy navigation and data entry
- Scalability to accommodate future growth and evolving business needs

The decision to pursue a Microsoft based solution grew out of the research and training available on the Microsoft learning portal, "Get stated with Microsoft Cloud for Financial Services." This training module shows how Microsoft can be utilized for Borrower Monitoring, Loan Application Management, and Improved Communications both internally and externally. See link: <u>https://learn.microsoft.com/en-us/training/paths/financial-services-in-a-day/</u>

BUDGET

The Bond Bank has budgeted up to \$12,500 for the scope described above. This is an estimated range subject to refinement as the scope is refined. As a quasi-governmental agency, however, the Bond Bank is conscious of the value proposition offered by prospective firms and may consider proposals that offer higher value through a more limited scope (and cost) or through an expanded scope (and cost).

VENDOR QUALIFICATIONS

The following qualifications are required:

- Demonstrated experience in developing Microsoft-based solutions for financial institutions
- Strong expertise in loan portfolio management systems
- Proven track record of successful implementations and client satisfaction
- Familiarity with industry best practices and regulatory compliance requirements
- Adequate resources and infrastructure to support the project

COMMUNICATION & TIMELINE

Questions regarding this request for qualifications ("RFQ") will be accepted via email to the distribution below until 10:00 pm ET on Friday, September 8th, 2023. Responses to questions will be provided on a rolling basis. The Bond Bank may elect to hold a call to facilitate a Q&A prior to the submittal deadline.

Responses to this RFQ are due via email to the distribution below by 10:00 pm ET on Friday, September 15th, 2023. Please limit response to 10 pages. *Respondents are expected to be available for interviews between 9:00 am ET and 2:00 pm ET on Wednesday, September 20th.*

michael@vtbondagency.org	elizabeth@vtbondagency.org

The Bond Bank reserves the right to delay, postpone, or not select a development firm. Selection is expected to occur on or before October 1, 2023. The Bond Bank expects to conduct interviews prior to the selection of a qualified firm.

Final implementation is targeted for December 31, 2023.

SUBMISSION REQUIREMENTS

- 1. Provide the name, title, and contact information for the Bond Bank's primary contact.
- 2. Describe your firm's process for project management and how the required content will be identified, requested, and organized.
- 3. Company profile and description of relevant experience.
- 4. Description of similar projects and two client references.
- 5. Team composition and key personnel's qualifications.
- 6. High-level implementation plan, including timelines and milestones.
- 7. Cost estimates and proposed pricing structure.
- 8. Let us know anything else you think is important!

ATTACHMENT A

PROPOSER WARRANTIES

- A. Proposer warrants that all information provided by it in connection with this proposal is true and accurate.
- B. Proposes warrants that it holds all required licenses and authorizations to undertake the services described in this RFQ.
- C. Proposer warrants that there are no existing or potential conflicts of interest that would prevent the proposer from fully performing the tasks described in the RFQ. Should a conflict of interest be discovered, the proposer shall make immediate disclosure to the Bond Bank.
